G SERIES
Positive Displacement
Rotary Gear Pumps
Gorman-Rupp has been revolutionizing the pumping industry since 1933. Many of the innovations introduced by Gorman-Rupp over the years have become industry standards.

More than ever, we continue to update our factories, processes, research and development and engineering to ensure that our pumps and systems are among the most reliable and efficient in the world.

When you purchase a Gorman-Rupp product, you buy more than just a pump. You benefit from our worldwide network of factory-trained distributors, knowledgable engineers and helpful customer service team.

The Gorman-Rupp G Series line of positive displacement rotary gear pumps is designed to provide unmatched performance, serviceability and adaptability.

G Series pumps are versatile enough to handle virtually any pumping application and liquid type. They are manufactured with unique features that enable them to last longer than other gear pumps in the industry.

Gorman-Rupp’s commitment to our original philosophy of innovation, continuous improvement, unparalleled quality and customer service continues to set us apart from others.

G Series positive displacement rotary gear pumps are available in a variety of drive configurations, including: direct, VFD, gear reducer, v-belt, engine or as part of an engineered packaged pump station.
GORMAN-RUPP DELIVERS RELIABLE, LONG-LASTING EQUIPMENT

The quality manufacturing and testing that go into every G Series pump guarantee long-lasting, trouble-free operation. If you need a replacement part for any of our products, you’ll have it fast. We fill and ship 99% of parts orders within 24 hours keeping you up and operating and ensuring your peace of mind.

Longer Lasting
All G Series pumps are designed with features that are only available on Gorman-Rupp rotary gear pumps. The quality manufacturing and testing that go into each pump ensure reliable pumping long after installation. Additional features include:

- **Rigid Rotating Elements**
  Optimum bushing locations provide high pressure operation while reducing overhung loads. On both packed box and mechanical seal models, the bushings are located as close as possible to the applied loads, providing maximum shaft support.

  High strength gear material eliminates the need for special steel pump fitted components traditionally required for viscous applications.

- **Internal Seal Vent**
  Venting provides continuous flow of liquid through seal cavity, ensuring cooling. The seal cavity maintains low pressure, reducing seal face load and increasing seal life.

Easy To Service
Intelligent design makes servicing G Series pumps faster, easier and more cost effective. Features common to medium, heavy and extreme duty pumps are:

- **Back Pull-Out Design**
  The back pull-out design provides the ability to perform service and maintenance without disconnecting pump housing from piping.

- **Adjustable No-Leak Pressure Release Valve**
  Innovative o-ring design on the relief valve allows for adjustment during operation, without leakage.

Fully Adaptable
Gorman-Rupp gear pumps are designed for maximum application flexibility and include built-in features that make them completely interchangeable with other gear pump manufacturers.

- **Rigid Pump Support**
  Foot brackets are centrally located under pump ports to provide stability to the pump and piping. Pumps can be configured to fit any piping configuration making them extremely versatile.

- **Multiple Port Positioning And Configurations**
  Interchangeable 90° or 180° housings with multiple port sizes on most models. Suction and discharge ports are available in threaded or flanged configurations.

Engineered Sealing Solutions
G Series pumps offer the widest selection of sealing options available in the industry.

- **Flexible Sealing**
  Gorman-Rupp rotary gear pumps are engineered to allow installation of industry-standard cartridge, compression packing or standard component mechanical seals.
MEDIUM-DUTY GEAR PUMPS
The flexible, economical solution for demanding applications.

01 | High Strength Iron Gears
02 | Internal Idler Pin Lubrication
03 | Hardened Idler Pin
    Optional hardened bushing
04 | Thermal Jackets For Temperature Control
05 | Deep End Feed
06 | High Performance Shaft Bushing
    Optional hardened bushing
07 | Flexible Seal Feature Allows For Multiple Sealing Solutions

High Strength Thrust Washer
A large, replaceable thrust washer supports higher loads and extends pump life.

Compact, C-Face Mounted GMC
For high performance in a small package, the GMC can be close coupled to motors as large as the NEMA 215TC frame.

Automatic Idler Pin Lubrication System
Unique internal pressure lubricated idler pin reduces wear by continuously cooling and lubricating the idler pin and bushing. Available on GMC, GMS, GHC and GHS models (unless equipped with silicon carbide bushings).

Medium-Duty Applications

HEAVY-DUTY GEAR PUMPS
The most capable, versatile gear pump in the industry.

01 | High Strength Iron Gears
02 | Internal Idler Pin Lubrication
03 | Hardened Idler Pin
    Optional hardened bushing
04 | Thermal Jackets For Temperature Control
    Optional backhead and/or head
05 | Deep End Feed
06 | High Performance Shaft Bushing
    Optional hardened bushing
07 | Flexible Seal Feature Allows For Multiple Sealing Solutions
08 | Externally Adjustable Clearance
09 | Maintenance-Free Double Row Ball Bearings

External Adjustable Clearance

The externally adjustable clearance and three piece design provide easy and precise rotor adjustment. Sealed double row bearings are maintenance-free and provide thrust control.

Deep End Feed Area

The deep end feed area offers superior priming performance and overall better pumping efficiency under low inlet pressure conditions and/or high viscosity liquids. Available on GMS, GHS and GHA models.

Engineered Sealing Solutions

Gorman-Rupp offers the widest range of sealing solutions for the G Series line of rotary gear pumps.

- Minimum leak- and abrasive-resistant packing
- Cartridge single seal with hard faces (requires steam quench)
- Cartridge double seal with hard faces (requires pressurized barrier fluid)
- Triple lip cartridge seal (requires steam or hot oil quench)

Heavy-Duty Applications

Hydrocarbons, Petrochemicals and Similar Liquids:
- LPG
- Fuels
- Oils

Viscous Liquids and Polymers:
- Adhesives/Glue
- Asphalt
- Grease
- Styrenes
- Varnish

Thermosensitive Liquids:
- Resins
- Tar

Acids:
- Acetic
- Phosphoric

Solvents:
- Acetone
- Ketones

Salts and Caustics:
- Soda Ash
- Viscose

Papermill Liquids:
- Black Liquor
- Kaolin

Heat Transfer Liquids:
- MobilTherm
- DowTherm

Food Products:
- Chocolate
- Vegetable Oil
- Syrups
EXTREME-DUTY/ABRASIVE GEAR PUMPS
The most rugged, wear-resistant gear pump in the industry.

01 | Hardened High Strength Iron Gears
02 | Carbide Idler Pin & Idler Bushing
03 | Thermal Jackets For Temperature Control
    Optional backhead and/or head
04 | Deep End Feed
05 | High Performance Shaft Bushing
    Optional hardened bushing
06 | Needle Bearing/Carbide Shaft Bushing Support
07 | Flexible Seals
08 | Externally Adjustable Clearance
09 | Maintenance-Free Double Row Ball Bearings
10 | Hardened Wear-Resistant Housing
11 | Hardened Wear-Resistant Head

**Extreme-Duty/Abrasive Applications**

- Barium Sulfate
- Diatomaceous Earth
- Enamels/Paints
- Filled Asphalt
- Fish Solubles
- Iron Oxide, Titanium Dioxide, Zinc Oxide
- Paper Coatings
- Pitch
- Printing Ink
- Waste Oils
- Wax

**Wear-Resistant Pump Head And Housing**

Critical wear areas of both the head and housing are hardened to resist wear and maintain maximum pump efficiency.

**Carbide Idler Pin And Idler Bushing**

Extremely hard carbide pin and bushing provide excellent wear resistance under the most severe abrasive applications.

**Needle Bearing Or Carbide Shaft Bushing Support**

Depending on seal configuration, extreme duty pumps are available with carbide shaft bushing or our unique, precision needle bearing which provides exceptionally reliable high-load shaft support and better rotor shaft stability, extending the seal life and operational life of the pump.

G Series Options

Various Port Sizes and Styles
- 180°/90°
- 1° (25 mm) to 6” (150 mm)
- NPT, ANSI FLANGE, BSP, DIN FLANGE

Bidirectional Operation

Various Bushing Materials
- Carbon graphite (low and high temp.)
- Siliconized graphite (low and high temp.)
- Tungsten carbide

Gear Materials
- Ductile iron
- Hardened austempered ductile iron
- Bronze gears
- SST gears are also available

Various Idler Pin Materials
- Hardened alloy steel
- Hardened tool steel
- Colmonoy coated
- Chromium oxide coated
- Tungsten carbide

Sealing Options
- Single
- Double
- Tandem
- Various elastomers
- Hard faced
- Quench
- Flush
- Metal bellows
- High temperature
- Corrosion resistant
- Cartridge style
- Heavy-duty lip
- Cartridge PTFE lip
- Packing
- Seal pot

O-rings of Various Elastomers
- Viton®
- Buna
- EPDM
- PTFE encapsulated
- Kalrez®

Hardened Wear-resistant Heads and Housings

Jacketed Heads and Backheads

Interchange Shafts/Housing Ports

Multiple Centerline Foot Brackets

Relief Valve Options
- Low/high pressure springs
- Return to tank style
- Various elastomers
- High temperature

FLUID-HANDLING EQUIPMENT DESIGNED WITH YOUR NEEDS IN MIND

Engineering and manufacturing superiority has been the hallmark of Gorman-Rupp since our inception in 1933. Today we bring our products to life in some of the most efficient, modern and state-of-the-art manufacturing facilities in the world. Gorman-Rupp has a selection of nearly 3,000 pump models, and our world-class team of distributors has worked closely with thousands of end users around the world. We have the proven expertise and the resources to specify, manufacture, test and service your pump, and to ensure reliable performance for the long haul.
