

# VALVE VAULTS

## ABOVE & BELOW GROUND

Gorman-Rupp's Valve Vaults are compact, weather- and vandal-resistant custom engineered systems ready to perform a variety of valve functions. These above or below ground units can house pressure reducing, surge control or altitude valves, or flow meters.

The above-ground enclosures are made of corrosion-, mildew-, fungus-, and mold-resistant fiberglass and have access doors on both sides to ease inspection and maintenance duties.

The below ground units are constructed from durable precast concrete, and like the above-ground systems, are impervious to the elements.
